IE7374 Explorer Instructions
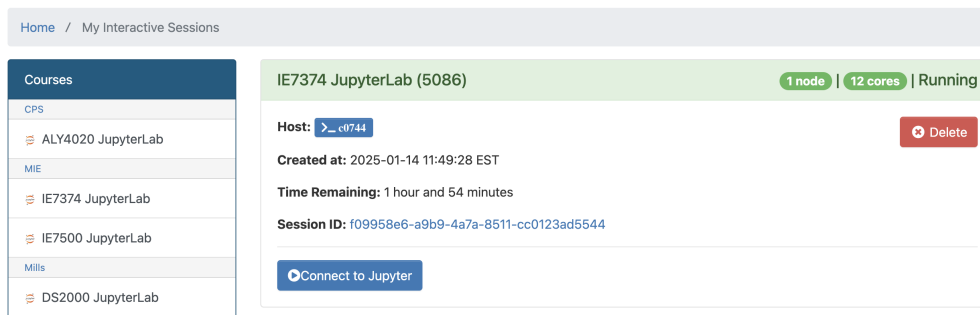

1. Login to explorer at: https://ood.explorer.northeastern.edu.

2. After logging in, under the **Courses** tab, select **IE7374 JupyterLab**.

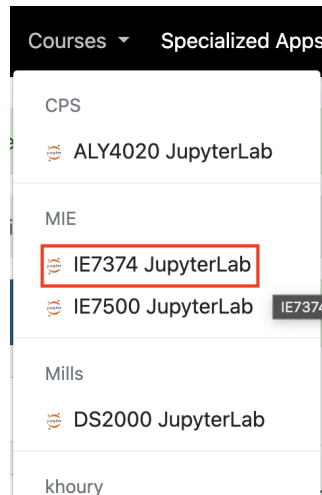

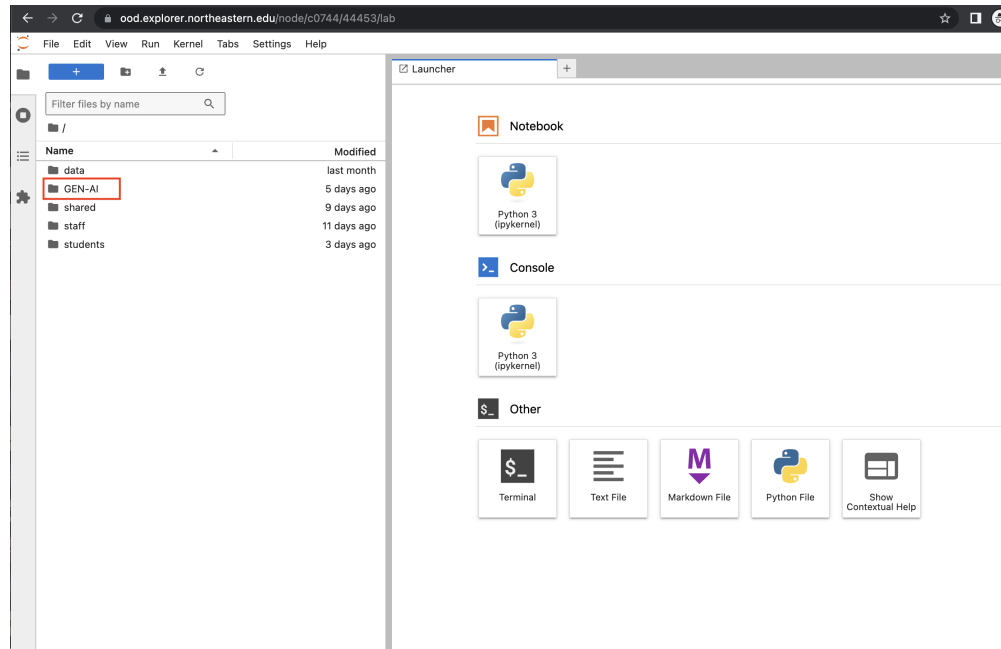

3. Now from the course page, select your respective **partition** and hit **Launch**.
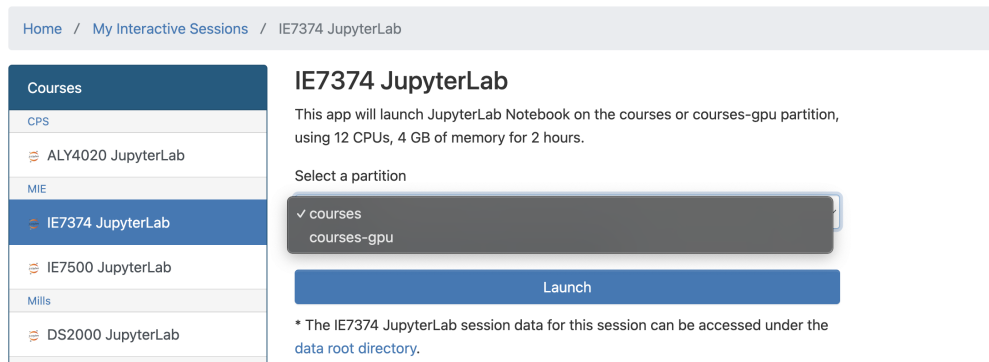

4. Hit **Connect to Jupyter** to start a jupyter lab session which will actively run for **2 hours**.

5. Inside the Jupyter Lab session, you can find all the lab materials under the Gen AI folder.

Running the Walkthrough Labs

1. The walkthrough labs are designed to provide a hands-on, interactive learning experience.

2. They help you understand key concepts and practical applications by guiding you through implementation and experimentation.

3. All lab materials can be found at: `GEN-AI > Labs`

4. Select a lab (not an assignment) and run each cell to explore the hands-on implementation.

Submitting Assignment Lab Notebooks

1. The assignment labs are specifically mentioned as: `Assignment.ipynb` inside each week folders.

2. All the instructions to complete the assignment notebooks have already been <u>mentioned inside them</u>. Please, go through them thoroughly.

3. Fill all the `#TODO` sections with appropriate code and then run the kernels.

4. Select your respective assignment notebook and make your changes.

5. Soon after you make your changes to the notebook,

   (a) Go to: "`File > Save Notebook As`"
   (b) Mention the path as: "`students/<Your_Username>/<Filename>.ipynb`"
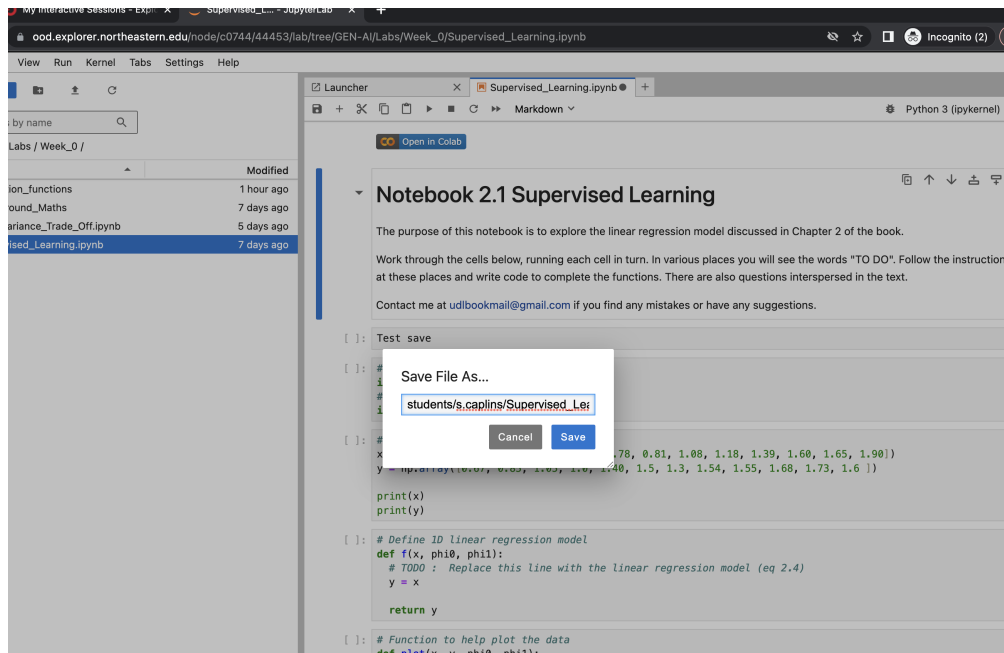

6. You can find your saved notebooks under `students/<Your_Username>` directory.
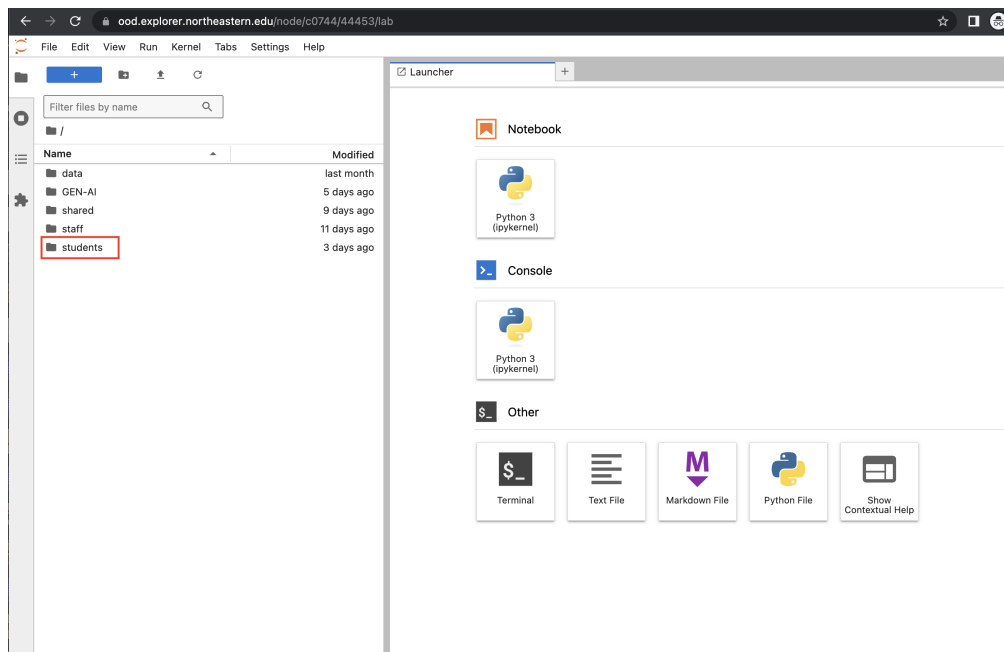

7. You could download this notebook by right clicking on it and selecting **'Download'**.

8. Make sure to upload your finished notebook with the following filename:
   "`[YourLastName]_Week[x]_Assessment.ipynb`"
